It will bring you to a screen which populates your full schedule (home and away). Even if there is a result posted you are supposed to enter a result code as well. Please click the box that shows your teams score.

If you have entered a result the game stat entry will post on the very top line of the page... It will display who entered the match results last and when.

If no results have been entered by your team at this point you would see (0) for both home and away scores even if the opponent has already populated a result.

Please enter your scores for both home and away.

If you have goals or cards you would enter this information from the section listed "Goals/Cautions/Ejections"

Select the player's name, the item type (goal, caution, ejection) and reason (if a caution or ejection) then add.
